BV Thermal Announces Relocation of Manufacturing Facilities

Willoughby, OH – August 2015 –BV Thermal Systems, Division of Budzar Industries, Inc. announces the relocation of Manufacturing Facilities to Willoughby, OH corporate headquarters of Budzar Industries, Inc.

By bringing the manufacturing to the company headquarters, the manufacturing space has more than doubled and will accommodate the growth expected from BV Thermal Systems. Budzar Industries Inc. has a 90,000 square foot manufacturing facility with a material handling capacity of 24,000 lbs. The manufacturing staff includes ASME and Sanitary Orbital welders and has earned ISO 2008 certification.

“By bringing the manufacturing to the Willoughby facility, we are in a better position to continue with BV Thermal Systems being an on time supplier of high quality heaters and chillers at a competitive price, said David Young, President of Budzar Industries. We have a staff in place from welders, to electricians, to mechanical and test. Another benefit for the BV Thermal Systems customer is that the manufacturing done at the Willoughby, Ohio headquarters will follow the systems and processes in place and thereby receive the ISO 2008 certification.

BV Thermal Systems, designs and manufactures refrigeration-based, temperature-controlled liquid recirculation systems and water-cooled heat exchanger systems. Well known for its Bay Voltex Chillers introduced in 1980, BV Thermal Systems serves the semiconductor, instrumentation laboratory, medical (lasers, blood analyzers, MRI systems, CT scanners), bio-medical, pharmaceutical, EDM and other high tech industries in North America and abroad.

“Relocating the manufacturing to Ohio is incredibly beneficial for our customers says Richard Broadbent, Operations & Engineering Manager at BV Thermal Systems. The manufacturing processes in place will streamline production and thereby speed-up delivery to the customer. Budzar Industries has proven up to the task when it comes to understanding our business and our customers. We’ve received terrific support with resources and we’ve been able to continue to develop our business for future growth”.

Since 1975, Budzar Industries has earned a reputation for quality and ingenuity in the custom design, engineering, and manufacturing of temperature control systems for a wide range of capital equipment. Today, Budzar Industries' products can be found throughout the world bringing accurate temperature measurement and control to the production of pharmaceuticals, chemicals, petroleum, plastics, rubber, paper, power, steel, food processing and more.
